

Mineral Foundation Beige 1.5 Use the little mini brush. Pull the clear plastic tab off the 3 holes to open it. Shake it with cover on to release some of the powder. Dab the brush in the powder. With cover in your other hand with the inside of the cover up, tap on the cover with the brush to get the excess powder off the brush. Then swirl the brush on the inside of the cover to even distribute the powder on the brush...

If you wish to purchase full size foundation – there is a bigger brush you can purchase as well. I think you will like this – it is very light coverage – just evens out your skin tones.

Dab the mineral foundation powder

Tap off excess into cover

Swirl brush in the excess powder in the cover

Then apply to face in downward motion to whole face and forehead.
