

SATIN HANDS INSTRUCTIONS:

HELPFUL HINT: Put in a basket by your sink. Then you will remember to use every day!

Step 1 – Hand Softener. Apply to top and bottom of your hands, in between fingers and on cuticles. Rub in like a lotion. This is a heavy duty moisturizer. Leave this on. Apply step #2.

Step 2 – Satin Smoothie Hand Scrub. Apply immediately after step 1. Massage into hands and between fingers. This will exfoliate all of your dead/dry skin off. I like to add just a little bit of water when scrubbing with this.

Rinse hands well and pat dry.

Step 3 – Hand Cream. Massage hand cream into hands and between fingers. This nongreasy hand cream leaves your hands feeling soft and silky.

This can be used on your feet as well for a pedicure!
